

# AP World History - Summer Assignments

The summer work for our PRHS AP World History - Modern course is intended to allow you to consider some of the **early** historical information and foundations of world history and to introduce you to the themes we will be considering throughout the course. In addition, I hope the readings tickle your fancy - I think that figuring out history is fascinating. Everyday people like you and me make small advances/inventions/discoveries and the world is changed forever... *How cool is that!*

On a serious note - you DO have to DO the readings/viewings/writings assigned. See the requirements below for the specifics. TEXT me with any questions over the summer.
